

ENVIRONMENTAL POLICY

We are committed to providing a quality service in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment. We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

We will:

- Integrate the consideration of environmental concerns and impacts into all of our decision making and activities
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner
- Train, educate and inform our employees about environmental issues that may affect their work
- Reduce waste through re-use and recycling and as far as possible purchase products that have or can be recycled
- Promote efficient use of materials and resources throughout our facility including water, electricity, raw materials and other resources, particularly those that are non-renewable
- Assess the environmental impact of any new processes or products we intend to introduce in advance
- Seek to minimise the use of energy in our activities, for example; lights and equipment will be switched on only when needed and not out of routine
- Strive to continually improve our environmental performance and minimise the social impact and damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities
